

# SIEMENS-SCHUCKERT CREW

By Dean Rodina

IT WAS THE 21ST FLIGHT of the Siemens-Schuckert airship which was undertaken on May 17, 1911. Not much is known about this flight, and even the airship-postcard flown on that flight does not say much about the flight itself. We only learn that the sender wrote from an *airtrip over Berlin*.

In addition to the rather marginal description of the flight, the card also bears five signatures: (1) A. DIETZIUS, he was the designer and constructor of the Siemens-Schuckert airship, (2) HUGO SCHENK, helmsman on board the airship, (3) INGENEER MORDHORST, his function on board or within the company is not known, he was engineer though, (4) D. VON KROGH, probably airship captain and (5) RUDOLPH HAAS, engineer on board. ■
